KEEPING TRADITIONS

POLJOT INTERNATIONAL

Ladies and gentlemen,

The roots of the brand “Poljot-International” lie in the establishment of the “First State Watch Factory” in the 30s of the last century in Moscow. In 1961, after the first flight of an inhabitant of our planet into space, the products of this factory have been given the name “Poljot” (the flight).

In 1992, in order to sell the watches of this brand, the distribution company “Poljot-V GmbH” was founded in Frankfurt/ Main (Germany), which already in 1994 under the guidance of its director, Mr. Alexander Shorokhov, proceeded with the creation of a new brand “Poljot-International”.

On the one hand, continuing the Russian traditions of the brand "Poljot", the newly founded watch brand "Poljot-International" has been choosing a fundamentally new way of development by using new high-quality material for the watch production, by creating an own modern design, high quality assembling of watches and a severe systematic process control.

The projecting works, manufacturing and certifying of watches were relocated to Germany, as a result of which the company could become completely independent and evolve its own development strategy. In the same year the company joined the "Federation of German Watch Producers".

The successful development of the brand „Poljot-International” made it possible in the following for the company to occupy a place under the leading watch manufacturers in the middle price sector.

The watches made by the company are now distributed in more than 35 countries. All watches “Poljot-International” are now produced in Germany. Nevertheless, you can feel and see the charm and the smoothness of the design, the dextrous hands of the watchmakers, the warmth of the Russian soul and of course their love to Russia.

BASILIKA

The brand “Basilika” is actually not new one, because the first and undoubtedly most successful watch series of the brand “Poljot-International” has just the same name – “Basilika”. Over many years, this name became a byword for the whole watch brand like a pseudonym. That’s why the registration of “Basilika” as new brand name in 2007, was a logical consequence of its successful establishment in the market. The new brand which also will be produced in Germany is continuing the traditions of innovation of the brand “Poljot-International” and will delight the watch collectors and connoisseurs by further development of new modern designs, technical and constructive innovations. More than ever, the attention will be directed to the watch details, the quality of the products and assembling works and the after-sales service. Our aim is to content our customers completely.

ALEXEY LEONOV

One of the most famous ambassadors of Basilika watches is Alexey Leonov, commander of the legendary Soviet-American space flight in 1975. With this flight, the Soviet and the American crews managed to suspend the “Cold War” for a moment in time.

The world press dubbed this extraordinary event the “Handshake in orbit”. The multiple-function watch “Soyuz-Apollo”, wearing by Leonov, features an automatic movement cal. 2427. with double barrel, world timer, day & date-display, dial with personal watch number; limited to 500 pieces.

PETER THE GREAT

Peter the Great was a reformer in the Russian empire of the 17th and 18th century. His reforms of the government, economy, science, culture and military were transforming this country from an agrarian state into one of the most modern and leading countries of Europe, at that time. With his help Russia obtained great importance.

It is not by accident that the heraldic sign of the Russian empire has been placed at the dial in great size and leaping to the eyes. Finally, the skeletonized and engraved movement and the open dial are creating a magnificent and powerful high-valued piece. Certainly, Peter the Great would much enjoy such watch. The watch is available in two versions – in stainless steel or with gold plated case and limited to 400 pcs. of each version.

NICOLAI II

Tsar Nicolai II is surrounded by many legends and contradictory rumours. However, for the historians one is sure – he was an educated and kind-hearted man with friendly and warm feelings to his family and Russia.

In August 2000, he and his wife (coming from the German aristocratic family of Hessen-Darmstadt) Alexandra Fedorovna and their 5 children were canonized by the Russian-Orthodox Church. This model line in rose gold is dedicated to Nicolai II.

For this wonderful watch the focus is on the skeletonized movement and dial. These two components are causing a feeling of the tsars' era in Russia. The rounded off case and the blued hands are completing the appearance of this watch model made in classical traditional style. This series is limited to 400 pcs. of each dial version and will have the corresponding limitation number on the dial.

9211.1941613

Hand winding movement cal. 9011 PI, skeletonized, stainless steel case with glass back, rose gold or PVD black covered, Ø 43 mm, h=12,4 mm, 5atm.

PETERHOF – RESIDENCE OF TSARS

HAND WINDING POCKET WATCH

The first pocket watches have been made from the 15th to the 16th century in the German town of Nuremberg. In this connection we remember the watchmaker Peter Henlein. Shortly afterwards, the triumphant advance of the pocket watches began. The small watches were appreciated everywhere. Nowadays, we see a real renaissance of them. The well-known, very reliable mechanical cal.3105 by Poljot will be fit in a fine steel case.

Hand winding movement cal. 3105, refined, rhodium plated, stainless steel case Ø 45mm, h = 12 mm, sapphire glass on both sides.

NASTJA

The exclusive execution of the ladies watches are beyond competition. The open skeletonized dial allows a fantastic view of the watch core - the movement.

The dials in silver, champagne or rose gold colours are decorated with zirkonia stones at the places of the figures 3,6,9 and 12. The hands are blued in traditional manner. The exclusive look is completed by the beautiful brown or black leather straps.

Automatic movement cal. 2723 SeaGull, skeletonized, open way dial, stainless steel case Ø 35mm, h = 10 mm, sapphire glass, glass back, 5 atm.

TOURBILLON- SKELETON

This tourbillon model was specially produced to be presented at the most popular international watch fair "Baselworld 2012". The dial has been designed by using crystal in order to see and enjoy the beautiful tourbillon movement, its perfectly shaped and skeletonized bridges. For the same reason, it is fitted with a see-through glass back.

GLOBETROTTER

For people who are often travelling in foreign countries and preferring something special, the model “Doubletmer” has been made in skeletonized execution. The day and night indication is placed on a disc showing, at the same time, a world map with sun and moon. This watch will be produced in three versions. Every version consists of only 300 pieces. Hand winding mechanical movement 9120, skeletonized and refined, indication of local and home time, day & night-display; small side second hand; stainless steel case with sapphire front glass and see through glass back, Ø 43 mm, h = 14 mm, 5 atm, limited edition of 300 pcs. of each version.

9031.8940444

REGULATOR

The regulators with open or closed barrel are of special interest for fans of the technical aspects of watches. The first regulators were used in observatories. Their accuracy was extremely high. Later on, calibrating devices used for time equalizing were called „regulators“. Here, the large luminous minute hand and the enormous figures indicating the minutes definitely stand in the limelight.

The hours and the second hands are located in the upper and side part of the dial. The open barrel permits a view of the “inner life” of the movement; developed in the manufacturer of “Alexander Shorokhoff”.

Hand winding regulator cal. 9031. P-I, stainless steel case with glass back, Ø 43 mm, h = 12,4 mm, sapphire glass, 5 atm.

NEW JAROSLAVL

Jaroslavl is one of the oldest towns in Russia. In the Middle Ages, the most important trade routes intersected here. It is not by accident that the Trans-Siberian railway lines also pass through Jaroslavl. Nowadays, its historical centre is one of the most magnificent places in Russia, and since 2005, it belongs to the World Cultural Heritage Sites of the UNESCO.

The timeless design of the watch and the dauphin hands make the watch a valuable addition to the P-I-collection.

CLASSIC CHRONO

The “Classic” line continues the “Baikal” line. The watches are designed in a “classical” style – which in translation from Latin, is synonymous with “in an exemplary fashion”. The style symbolises glory and stability while transmitting a feeling of harmony and regularity, outside of all things transitory.

The succinct and elegant appearance, the clear design, but also the unobtrusive colours of this watch turn it into one of the most classic watches of the Poljot-International-collection.

MICHAEL GORBATCHOV

In the 1990s, the face of this man was known in every country of the world. His fame surpassed even that of any idol. It was Michael Gorbachov who broke through the “Iron Curtain” between West and East. The specters of antagonism disappeared and people began to treat each other with increased sympathy and respect. For the 25th anniversary of the company, this bestseller will be produced again. This time, it has an automatic movement. At the dial are rose gold appliques instead of figures. 2 flags are symbolizing the transition of the USSR into the Russian Federation. The words at the dial’s rim are also expressing the reorganization of the state with following Russian words: “perestroika” (reorganization), “glasnost” (freedom of speech), freedom, reforms, democracy and peace.

2427.1546513

2427.1546512

2427.1546511

The watch is limited to only 250 pcs. of each dial version. Automatic movement cal. 2427 Slava with day&date, stainless steel case Ø 43 mm, h = 14,2 mm, sapphire glass, coloured glass back, 5 atm.

BAIKAL

The lake "Baikal" is one of the most magical places of Siberia. It enthuses people by its archaic beauty, inspires and captures them. Also the watch impresses by its fineness, elegance and delicacy. The great format and the glass back are supposed to mean this natural treasure.

YAKUTIA

Yakutia is a rich constituent republic of the Siberian part of Russia. Its wealth consists in gold and diamonds. A legend says that God, when creating the earth he sent out an angel bearing a big bag full of treasures. When the angel was flying over Yakutia his fingers felt numb with biting cold and he dropped the bag. In this way, the region got rich of mineral resources. The ladies watch "Yakutia" is also exuding this richness and local colour of this republic. The MOP dial with its Swarovski stones and the small second hand near "6" in national style are indicating this. With the classical case and the automatic movement the watch will be your perfect accessory for daily wearing as well as for festive occasions.

2706.1330634

Automatic movement calibre 2706 SeaGull, stainless steel case, Ø 35 mm, h = 10 mm, 5 atm, glass back, sapphire front glass.

9011.1940867Z

NIGHTS OF ST. PETERSBURG

While in Moscow the nights are dark, the nights in St. Petersburg are very light. Like the nights you will feel the watches with the warm dial colours more light and romantic – they are glimmering like the sky over the town.

Thanks to the distinct large lettering one cannot, night or day, lose track of time. The refined movement under the glass back completes the magic appeal of this model.

9011.1940864

9120.2940336

DOUBLETIMER

For people who are often travelling in foreign countries the watch model "Doubletimer" will be a very helpful thing. It shows not only the local time and the time of your home town; moreover it has a day & night-display. The dial was made of high-grade mother of pearl; the case is of stain-less steel. Besides it has a very smooth comfortable leather strap. Hand winding mechanical movement 9120 PI, indication of local und home time; day & night display; stainless steel case, Ø 43 mm, h=14 mm 5 atm, glass back, sapphire front glass.

9011.1940067

9011.1940064

MOSCOW NIGHTS

The song about “Moscow Nights” that lent its name to this watch model made an entry into the “Guinness Book of World Records” as song most frequently sang in the world.

You can hear it in India in all local dialects, in distant Nigeria sung in the old Hausa language, and in foggy Copenhagen where sailors salute each other with words from this song. The catchy melody and the deeply moving words made it a true figurehead of Russia.

Hand winding chronograph cal. 2901 SeaGull, refined with “Geneva Stripes”, stainless steel case Ø 43,0 mm, h = 14,2 mm, 5 atm, glass back, sapphire glass.

POLAR BEAR

„Polar Bear“ is the name of one of the most successful watches by Poljot-International. In order to continue in this way, we have carried out a treatment of rejuvenation. The watch will get a classic design and thus fit into the overall picture of the whole collection.

This watch with its 24-hours-display is certainly one of the exotics among mechanical watches. The hour hand is making one turn only in 24 hours. Such watch need to have pilots, seafarers or people living in the Arctic regions. The "Polar Classic" is available in four different dials with the matching in colour calf leather straps.
